

Methods of Study in Natural History (American environmental studies)

Science as Power: Discourse and Ideology in Modern Society (Language, Discourse, Society), Logical Self-defense, Intelligent Systems: Principles, Paradigms, And Pragmatics, Crichton, I Can Draw Animals (Usborne Playtime Series), Manitoba: Outdoor Recreation Guide (Backroad Mapbooks), King of the May - A Virginian in Elfland (The Hounds of Annwn Book 3), Masterpieces of the Imaginative Mind: Literatures Most Fantastic Works,

Methods Of Study In Natural History by Agassiz, Louis. Arno Press, Reprint. Hardcover. Very Good with no dust jacket. Full green cloth hardcovers with decorated front cover and spine title. Covers are clean, faint rubbing at spine ends and corners, nick in cloth along foredge of front cover. Interior is in very good condition, clean and tight. History of Environmental Science Early scientists were interested in exploring new species and concepts in order to understand the natural processes of the earth. Environmental history is one the, if not the most, interdisciplinary fields of historical study, pushing scholars to embrace the techniques of disciplines spanning the spectrum fr om archeology to zoology.¹ The primary branches of environmental. A natural experiment is an empirical study in which individuals (or clusters of individuals) are exposed to the experimental and control conditions that are determined by nature or by other factors outside the control of the investigators. Environmental Studies 3 patterns and processes, are approached from a multi-disciplinary framework and within the context of the surrounding landscape.
